Figure 1: Cross–sections (pb) per bin of $(M_{jj}, \Delta y_{jj})$, for $pp \to jj\mu^+e^+\nu_e\nu_\mu$ at the LHC@13TeV, respectively at $\mathcal{O}(\alpha_{ew}^6)$, $\mathcal{O}(\alpha_{ew}^4\alpha_s^2)$ and $\mathcal{O}(\alpha_{ew}^6 + \alpha_{ew}^4\alpha_s^2)$ tree–level orders (from the top down).
